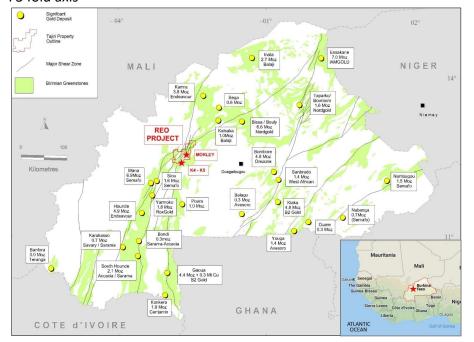

Figure 1: Location Reo Gold Project and K4-5 Prospect

The Reo Gold Project, situated ~130km west of the capital Ouagadougou lies at the complex and poorly understood junction of the Hounde-Boromo and Goren Greenstone belts in central west Burkina Faso, Africa.

The K4-5 Prospect lies at the southern end of the 1,200 km² Reo tenement package as circled, but extends NNW for 14km of strike, through the Dassa Prospect, folded around a major NNW striking F3 fold axis
